

SPEECH BY
YANG BERHORMAT LOKE SIEW FOOK
MINISTER OF TRANSPORT MALAYSIA
LAUNCH OF SELANGOR AERO PARK @ KLIA
5 JUNE 2025 | SELANGOR AERO PARK

Good afternoon.

1. There are moments in a nation's journey when we plant the seeds of tomorrow — and today is one of those moments.
2. With the launch of the Selangor Aero Park at KLIA Aeropolis, we are not just unveiling a new development. We are launching a bold vision — one that speaks to Malaysia's future as a regional powerhouse in aerospace, logistics, and advanced industry.
3. This is a partnership rooted in purpose. Malaysia Airports Holdings Bhd (MAHB) and Menteri Besar Selangor Incorporated (MBI) have come together with a shared ambition — to build an integrated, future-ready ecosystem that empowers industries of tomorrow.

4. Let me be clear — this is not just about opening an industrial park. It is about building a launchpad. A launchpad for innovation. For investment. For talent. For high-value industries that don't just move goods — they move ideas, build skills, and create jobs that sustain families and grow communities.
5. As global trade routes evolve and regional economic integration deepens, we know that logistics is no longer just a support system. It is a strategic asset. And the Selangor Aero Park will be the heartbeat of that asset — where air, land, and sea move in concert to power industrial growth and economic resilience.
6. But let's be clear — our ambition is not simply to move goods. It is to move up the value chain.
7. And that is why this development matters. Selangor Aero Park offers seamless integration between air, land, and sea — a multimodal hub designed for efficiency, precision, and speed. It gives our exporters, manufacturers, and innovators a new edge in a fast-changing region.

8. The industries we anchor here — advanced manufacturing, aerospace, precision engineering, green technologies — they don't just generate exports. They generate opportunity. Every high-value shipment that takes off from this park carries the potential for skills transfer, R&D, innovation, and Malaysian talent at the forefront.
9. These are industries that create meaningful work, attract global capital, and — most importantly — offer our youth a future grounded in skills, not just labour.
10. The Selangor Aero Park is built with that future in mind. Smart infrastructure, digital connectivity, and trade facilitation — all supported by federal and state alignment — this is how we set ourselves apart.
11. By clustering these industries in a purpose-built ecosystem, supported by smart infrastructure and trade facilitation, we send a strong message to the world: Malaysia is open for business, and we are building the future — not waiting for it.
12. This project also aligns with our national priorities: the National Transport Policy, the Industrial Master Plan 2030, the National Aerospace Blueprint, and the Ekonomi MADANI vision. Together, these strategies are designed to raise the ceiling of our economic potential while ensuring no one is left behind.

13. I want to congratulate Malaysia Airports and MBI for their foresight and commitment. And to everyone who worked to bring this vision to life. This is how progress happens — through partnership, vision, and execution.
14. Let us remember: great nations are not built by chance. They are built by choice. By choosing to invest. Choosing to collaborate. And choosing to believe in the promise of what lies ahead.
15. Congratulations to all. I look forward to seeing the Selangor Aero Park soar.

Thank you!
