

# **Marina Development in Tioman island**

Start Date:-

Current Completion Date:-

# Background

The proposed project involves the repair/upgrade the existing pier structures to accommodate the needs of its use as a result of rapid growth in activities at the ports managed by the Marine Department.

The procedure in monitoring process and the operational department has been affected as the operation processing area are very limited. To overcome this problem of excess in capacity, the building and the jetty must be repaired and upgraded.

13 4 2007

# Summary
